

/Users/archanar/three
_pt_analysis/semble_install
/include/semble/semble_semble.h

```
graph BT; A["/Users/archanar/three_pt_analysis/semble/test_lib/main.cc"] --> B["/Users/archanar/three_pt_analysis/semble_install/include/semble/semble_semble.h"]; C["/Users/archanar/three_pt_analysis/semble/test_lib/test_evec_matching.cc"] --> B;
```

The diagram illustrates a file dependency structure. At the top is a gray box containing the path to a header file: /Users/archanar/three_pt_analysis/semble_install/include/semble/semble_semble.h. Below this box are two white boxes. The left box contains the path to a source file: /Users/archanar/three_pt_analysis/semble/test_lib/main.cc. The right box contains the path to another source file: /Users/archanar/three_pt_analysis/semble/test_lib/test_evec_matching.cc. Two blue arrows point from the bottom of each white box to the bottom of the gray box, indicating that both source files include the header file.
